IN MEMORIAM.

To the W. M., Officere and Brethren of the Nanaimo Lodge, F. & A. M., No. 3, B. C.

We the undersigned Committee, appointed to draft resolutions in regard to the loss of our beloved Brother THOMAS JACKS AINSLEY, respectfully submit the following: other THOMAS JACKS AINSLEY, respectivity subit the following:

Wigness, It has pleased the Great Architect of the
Wigness, It has pleased the Great Architect of the
Wigness to remove from us our worthy and well-bered Brother Thomas Jaces Ainsley, Commander of the
ugon Steamship Company's steamer 'George S,
right," who is supposed to have lest his life in the
usarge of his duties in January, 1873, in Queen
nariotte's Sound; and
Wunness, It is fitting that we should express the rewand deep sorrow that we should express the rewand deep sorrow that we sole for the loss of our
tend and Brother; therefore, be it
Resolved, —That by the death of Brother Ainsley we
we lost an upright and zealous Brother, and those who
we wisn; an esteemed and valued friend.

Besolved, —That the sincere sympathy of this Lodge be
undered to his relations and friends in this the hour of
soler afficietion. Biction.

That the Jewels of the Lodge be draped it beg, and that the Brethren wear the usual badge.

ty days.

st.—That these resolutions be spread upon the cof the Ledge, and that they be published in the land fortland papers; and also, that copies be took to the relatives of our lost Brother.

from Bests, to be grown on land acquired by the Company, consisting of rich alluvisi soil well sdapted for their growth.

This land contains all the essentials necessary for the cultivation of the best description of Sagar, Best; being very rich in regetable matter, and experience has shown that it is unexcelled for the purpose. Large tretts of equally valuable land can be had on very favorable terms; certainly not exceeding one tests of the price of steller lends to California, and important consideration,

ruitivated in the most favored sociation was proved principles.

The percentage of Saccharine matter, according to published records of European cultivators, gives 8 to 9 per cent. as the average, whereas, in the Fraser Valley, the per centage was 10 to 11: six-tenths being granulated sugar of very fine quality, and the remainder moise-see of fine flavor, a result unknown elsewhers.

This being the result on new land, and with the most imgerfect appliances, it will be readily understood, that with a proper system of cultivation, and with proper machinery, the profits of the company will be very large.

machinery, the profits of the company will be very large.

The quantity of sugar imported into this Provisce for the year ending June 30th, 1872, was valued at over \$100,000 the importation of Molasses, during the same period, amounted to \$16,000. It with therefore, be used that a ready market is open for all the sugar and malasses the company can produce. The pulp, or refuse, compasses the best kind of food for fattening cattle during the winter mouths, when the highest prices are obtained for beef, mutton, &c.

The bost of labor, it is calculated, will be as low as in California, while the fuel and other materials, including the lumber for building, will be much lower.

As the company proposes to commence operations on

As the company proposes to commence operations limited scale at first, the Capital Stock has been fir t \$50,000, while power is reserved to the Sharebel o increase the working capital to \$100,000, if consid-

advisable.

A: Letters of Allottments can be obtained from the Secretary of the Company at New Westminster, as from the Bank of British Columbia, or Mesers. Roberts & Johnson at Victoria.

The people of New Westminster city tion that vessels would have to encounter Whatever their hands find to do, they do it with all their might. Difficulties Northern Pacific Railway at no distant ment Street merer daunt them, nor do disappoint date having a terminus at some conveni-ments discourage them. They are to all ments discourage them. They are to all entire the more absolutely necessary, on purely the more absolutely necessary, on purely commercial grounds, that the terminal of our road should be at Esquimalt and no where else. We much give various other reasons why Esquimalt should be giant trees assuming to hid defiance to ster to the very margin of the river, the giant trees seeming to bid defiance to the puny efforts of man to remove them, present we forbear to pureus the subje has disappeared before the stardy blows of the woodman's axe, and given place to well made streets, handsome residences of the liquity indontable percever-ence, and that description of faith which 'laughs at impossibilities and cries it country, to open up and develop its re-sources. They are eminestly deserving of success, as a reward for their persev-erence, and none more cordially desire to see them achieve it than we do. Nor. do we see any reason for finding fault with them on account of their appirations after commercial fame, as evinced by their desire to have the terminus of the Canadan Pacific Reliway located either to Burrard Inlet or New Westminster. It is but natural they should do so, al-It is but natural they should do so, although it seems strange how a peopla in other respects so shrewd and intelligent should allow themselves to be carried away with acidea so self-evidently absurd. However, as there is no accounting for these things, and as we have no hope of being able to disabuse their minds of what appears to be a deep-reoted hallucination, we must suffer them to the them to the said to t these reflections from having read a com- Faworr, Esquine, to be Government Agen munication in a late edition of the Toronto at Nanaimo, vice P. Texvox, Esquine, re-Globe, written by a person who signs, himself "Colonist," and dated New Westminster, January, 1873. Did the writer west the subject fairly, and not resort to misrepresentation with a view to strengthen his position, we should pay no attention to the subject, but let the matter go just for what it is worth. We admit the right of our New Westminster friends to use all fair means to persuade the Railway Company, or the Govern-ment, that it will be to the advantage of the Dominion as well as to the Com-pany to make Burrard Inlet the terresorted to, we deem it our day to state the facts of the case, and to remove, as for any ve can whatever false impressions said misrepresentations may have given ruse to. He admits that the route by way of Buta fulet would bring the terminus some 60 miles nearer the open ocean than it would be if placed at Burrard Iulet, but that the total length of the line, would be from 150 to 200 miles greater in order, to reach Esquimiles greater in order to reach Esquivalley of the Fraser and terminated at Burrard Inlet. In point of distance Burrard Polet would undoubtedly have a few miles the advantage of Esquimalt, PUBLIC AUCTION. but that the difference in the cost of construction would be so great as to make it an object to prefer the shorter route, it just where we would join issue with the writer of the letter referred to. Those who have been over the respect-Tete Jaune Cache to Johnstone Strait with the exception of a few miles before recibing the Strait, is through a beauti-fal solling country offering scarcely any engineering difficulties to the construction of a railway; and even through that portion of the coute which to the eye o armountable, we are assured the as they appear. On the other hand, to carry the line stone he valley of the Fraser, as contended for by "Colonist," if not di engineering impossibility, would be so immensely expensive as to preclude all hope of it ever being carried in that direction. Hence, even admitting the difference in the length of line between the rival routes to be as great as the Globe's correspondent represents it to be it is apparent question as to whether the longer route would not be the cheaper one besides bringing the tarmines 60 miles nearer to the open ocean. We have no wish to disparage that section of country to which 'Colonist' refers as constituting "the garden of British Columbia," and which would undoubtction of the railway in its immediate vicinity. A That it is an extensive, rich and fertile section of country, admirably puted, and that sooner or later it will have the advantage of railroad communecting with the trunk road, we believe to be quite within the range of future not by any means the only part of our vast domain admirably adapted for settlement, that section known as the Chil-coaten country being quite equal both in extent and festility to any other part of the Province. The idea that the line of railway, if carried through this Island from Johantone Strait to Esquimalt bestile vessel," is so supremely absurd as searcely to merit serious consideration; and so we might a lso say of the allusio to the exposed condition of Esquimalt harder. Probable there is not a harbor on the entire Pacific coast that could asse) esaily be made impregnatile than Requimalt, nor one where ships of every

have always been noted for in order to reach Burrard Inlet, is anopossession of energy and pluck. ther item which "Colonist" conveniently

BANKERSADIA

BANK OF BRITISH COLUMBIA. THE COMPANY IS FORMED FOR the purpose of acquiring the property known as the Belmont Factory, situate on Esquimalt Harbor, and the business carried on therein, commisting of Tanning, and Boot and Shoe Manufacturing, and of continuing and Boot and Shoe Manufacturing, and of continuing the same.

The purchase would include the Land, Buildings, Machinery, Plant, Stock-in-Trade and goodwill of the basiness, all of which it is proposed shall be taken as aluation to be made by competent disinterested persons. The Boot and Shoe Department has for the past two years been carried on under the management of Mr. Switzer, almost exclusively by Chinese labor, as a small cost, but the recent addition of the Tannery, which was found a necessity, in order to maintain a sufficient supply of good material, has required a considerable outlay, and renders the introduction of further capital necessary for the proper development of the business.

The Pactory is well arranged, and is fitted with the most approved Machinery.

The Tannery has every appliance for the saving of labor.

The Water Power which is utilized when the saving of labor.

abor.

The Water Power which is utilized for the conduct of Works, is all that could be desired, and could readily be nervesed to ten times its present power, if at any time equired, either for the purposes of this undertaking, or r any other Manufactory. The supply is derived from prings on the Estate, is ever soft in quality, and is ever failing.

for any other Manufactory. The supply is derived from Springs on the Estate, is very soft in quality, and is never failing.

In fact the business is in thorough working order, and Mr. Switzer's scripes as Manager of the Weeks will be retained upon terms favorable to the Company. The Land consists of 516 acres, known as the Spring Vale Estate, some of which is of excellent quality. The Timber is of considerable value for Pirewood, the situation being favorable for easy delivery.

The operations of the Boot and Shoe Manufactor during the past two years have been highly satisfactory. The goods are specially adapted to the requirements of the Provincial trade, have given general satisfaction, and at a profit successfully, compete with the imperial acide.

The sales for 1872 amounted to nearly 20,000, which, considering the short time the enterprise had been in operation, shows the favor with which the post site have been received.

The importations of Boots and Shoes as declared at the Custom' House for the year 1871, was about \$100,000, representing a selling value, after adding duties, etc., of asy \$150,000. The importation for last year fell of considerably, the decrease being doubtless partially eccasioned by the local production. In addition to the demand for Boots and Shoes, as evidenced by the Customs House returns, the sales of Leather produced at the Tannery have to be taken into account, when considering the entire field for the operations of the undertakeing.

The Tannery operations, only commanded fei August

Tannery have to be taken into account, when considering the entire field for the operations of the undertaking.

The Tannery operations only commenced its August last, and as the tanning process involves a period of several months, the business of this Department sain its infancy—a very superior article is, however, being moduced at low prices by an economical process, and, as there is no difficulty in obtaining an abundant supply of the general demand for harness, mill belting, and, in addition to the requirements of the Boot Factory.

The Belmant Boot and Shee Factory was the first enterprise of its kind established in the Province, and its having been so far carried on with success is an assurance that, as population increases, very remunentive returns will be realised.

The value of industrial institutions to the well, being of any country is indisputable, and as the hides freduced in the Province are now being manufactured into leather, which in turn is made into Boots and Shoes, &c., (instead of as formerly being exported and theory, and the manufactured articles in turn imported,) the saving to the country by the indertaking is sufficiently obvious. It is, therefore, not unreasonable to assume that the advantages which the prosecution of such a reproductive character of the business, have due weight with all whe are in any way interested in the prosperity of the Prevince.

It should be remarked that this company will become at once possessed of two businesses with established connections, without any interruption to working of loss of time in transfer, and will therefore have from the first day of its possession a revenue from a business which is capable-not only of manufacture. But purchase will be effected to a large extension.

Most similar undertakings of any magnifules are new worked successfully by joint stock companies, both in Great Britain and in the United States.

The transfer of the property to the Company will only be made upon terms antistactory to the Previousless of the professor, a posti

as executive influence can avail. Social equality is not a subject to be legislated upon nor shall I ask that anything be done to advance the social status of the celcured man, except to give him a fair chance to develop what there is good in him, give him access to schools, and when he travels let him feel assured that his conduct will regulate the treatment and fare he will receive. The States lately at was with the General Government are now happily rehabilitated, and no executive control is exercised in any other State

under like circumstances.

Is the first year of the present Administration the proposition came up for the admission of San Domingo as a territory of the Union.

It was not a question of my speking, but was a proposition from the people of San Domingo of this country for the people of San Domingo and all concerned, that the proposition should be received favouantly. In was never, redeted feasible fanily and therefore he subject was never brought up again by me. In future while I hold my present office the abject of acquisition of territary must have the support of the people before I will recommend any proposition looking to such acquisition. I say here, however, that I do not share in the apprehension hold by many as to the danger of governments becoming weaken.

of territory. Commerce, education and rapid of this country for the people of San Doming of territory. Commerce, education and repic transit of thought and matter by talegraph and steam have changed all this; farther do action, speaking one language, and when disting and the ries will be an longer tongined.

My efforts in the future will be directed to the restoration of good feeling between the

different sections of out change condry; to the restoration of our currency to a fixed value, as compared with the world's standard of values gold, and if possible to a par value with it; to the construction of cheap routes of transit throughout the land, to the end upon the ocean; to the encouragement of end that the exports of home products and industries may pay for our imports, that only sure method of returning to and permanently. It is either this or a war of extermination.
War of extermination engaged in by people pursuing commerce and all industrial pursuits are expensive even against the weakest people, and are all demoralizing and wieled; and as superiority of strength and the advantages of civilization should make as lenient towards the indians, the wrong already inflicted upon them should be taken into account, and the balance placed to their credit. The moral view of the question lember.

always full, and no air is permitted in the pipe."

This is another rash atatement, which to put in the mildest form is simply not according to fact. If "C." take the trouble to call on the members of the Council, he will find on the members of the Council, he will find on the members of the Council, he will find on the members of the Council, he will find on the members of the Council, he will find in their possession estimates and reports on similar works about to be constructed where

was resolved to perform my part in a strugger gle threatening Bevery expenses of the nation. I performed a conscientious duty, with a sking promotion of command; and without a revengeful feeling towards any section or any individual; netwithstanding, throughout the war and from my candidacy for my present office in 1862, to the close of the last Presidential campaign, I have been the subject of abuse and slander searcely ever equally in political basis, which to day I feet that I can afford to disregard in view of your section, which I gratefully ac-

cept as my vindication. Maravilla Coccar Opinions of the Press.—"Those who have notyet tried Maravilla will do well to do so."—Morning Post "It may justly be called the perfection prepared Cocoa."—British Medical Journal
